DETAILED ACTION

Allowable Subject Matter

Claims 1, 2 and 4-9 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for verifying the integrity of a message. The sole independent claim identifies the uniquely distinct features of "comparing the calculated authentication value with the second authentication value to determine whether the authentication values match; accepting the message if the authentication values match; wherein the authentication values are calculated based on the message, the first value specified by the first party and the counter value at least partly specified by the second party". The closest prior art, Patel (US 6,918,035), discloses a conventional method for authenticating communicating parties with one another that fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
